

Well

PRACTICE INTRODUCTION

USDA, Natural Resources Conservation Service - practice code 642

DEFINITION

A Well for conservation purposes is constructed or improved to provide water for irrigation, livestock, wildlife, or recreation.

PRACTICE INFORMATION

The purpose (s) of the practice is to facilitate proper use of vegetation, and provide water

for livestock, wildlife, recreation, and crop production.

The practice applies to drilled, driven, and dug vertical or horizontal wells constructed to supply water from an underground source.

Additional information including design criteria and specifications are in the local NRCS Field Office Technical Guide.
